PREMIŠLJENO ZAPOLNJENI PROSTORI

SPAJANJE VEČ ENOT SKUPAJ

Mobilne hiške HöNA Mobile House krasi moderen dizajn, ki predstavlja udobje in skladnost z naravo. Lahko se uporabljajo kot bivalni ali poslovni prostori, prav tako pa so primerni za športne aktivnosti.

Mobile homes HöNA Mobile House adorns a modern design that represents comfort and harmony with nature. They can be used as residential or business premises and are also suitable for sports activities.

HöNA MOBILNE HIŠKE

Potencial, ki ga prinaša življenje v mobilnih enotah, prepoznavamo kot izjemno pomembnega, saj tradicionalne hiše in blokovska naselja že lep čas izpodrivajo alternativne oblike domovanj, ki s svojimi pogostokrat inovativnimi oblikovanji ponujajo ugodnejšo različico za reševanje bivanjskih vprašanj.

Izvirnosti pri oblikovanju teh hišic res ne manjka. Za njen moderni videz tako poskrbi podoba, ki spominja na narobe obrnjen lik trapeza. Kljub sodobni zasnovi pa enota še vedno ohranja prepoznaven element organskosti, zato se lepo zlije z okolico in naravo.

HöNA MOBILE HOUSES

We recognize the potential of life in mobile units as extremely important, as traditional houses and apartment buildings have for some time been supplanting alternative forms of homes, which, with their often innovative designs, offer a more favourable version for addressing housing issues.

The creativity in designing these cottages is in abundance. Its modern appearance is ensured by an image reminiscent of a reverse trapezoidal shape. Despite its modern design, the unit still retains a recognizable element of organicity, so it blends well with its surroundings and nature.

PREDSTAVITEV MOBILNE HIŠKE

Vsa domovanja, ki jih ponujamo v svojem naboru, so izdelana iz naravnih materialov. Konstrukcija hiške je tako narejena iz lepljenega lesa. Pri zaključnih fasadah pa je izbira nekoliko večja, saj gre pri tovrstnih odločitvah predvsem za lasthe želje in potrebe kupca, zato se pri uporabi materialov v tej fazi izgradnje ne omejujemo.

Mobilne hiške so enostavne tako za transport kot za montažo. Vgrajeni so kvalitetni materiali, ki hiškam dajejo izgled modernega dizajna. Materiali imajo izredno dolgo življenjsko dobo, izredno dobra izolacija hiške pa je primerna za vse podnebne razmere.

Primeri različnih barvnih enot:

V podjetju HöNA Vam nudimo širok spekter barvnih različic hišk, kar naredi hiško še bolj posebno in edinstveno.

Kateri letni čas in okolje je primerno za hiško?

Mobilne hiške HöNA so primerne za različna klimatska obdobja. Pravljična zimska idila, poletna juga ob morju, spomladansko prebujanje ali jesenski počitki.

Mobile homes are easy to transport and install. They are built of quality materials which give them a modern look. The materials have an extremely long life span. In addition, the house's exceptionally good insulation makes it suitable for all climatic conditions.

Examples of various colour units:
At HöNA, we offer a wide range of colour options of houses, which makes the house even more special and unique.

What time of year and environment is appropriate for the house?

NEKAJ VEČ O HöNA MOBILNIH HIŠAH

Da bo vaša odločitev lažja, vam HöNa MOBILNE HIŠE ponuja štiri tipske enote. Vsaka tipska enota se pa lahko na želje stranke spremeni, saj ni omejitev pri izdelavi.

Če imate nek osnovni koncept oz. predstavo o vaši sanjski hiški, pa le to predstavite našim arhitektom, kjer se vaše želje vkomponira v idealno enoto.

Tipske enote se med seboj razlikuje po kvadraturi, notranji opremi, barvi fasade oz. ovoja. Na željo kupca se tipske enote lahko tudi spreminjajo glede kvadrature in opreme, prav tako pa lahko izbirate ali bi imeli ob hiški teraso ali ne.

Pri notranji opremi vam ponujamo možnost kataloške izbire ali pa vam notranjo opremo izdelamo pa vaših željah, zato smo hiške razdelili v tri tipe enot, ki se razlikujejo glede na debelino sten, uporabljenih materialih, bivalnem pohištvu in zaključnih slojih.

Poleg debelega izolacijskega sistema, dodatno zaščito nudijo tudi okna iz trojnega termopana. Vse izolacijske komponente med seboj ustvarijo izjemno dobro protihrupno zaščito.

Ravna streha Rephanol je najstarejša in širom sveta najprepoznavnejša kakovostna strešna kritina, ki je proizvedena v Nemčiji.

Enote se lahko med seboj tudi spajajo tako v horizontalni poziciji kot vertikalni, odvisno seveda od želje naročnika. Za tiste, ki si v svojem domovanju želijo več razkošja, lahko na drugem nivoju dodamo tudi jacuzzi ali savno.

Naše štiri tipske enote so: HöNA Hooneymoon, Antonia, Good life in Big dreams.

Poleg tipskih enot v ponudbi izdelujemo tudi hiše po naročilu, različne po velikosti kot tudi po izgledu. Tako so nastale mobilne enote velikosti 24m² vse do 252m². Narejene so po željah naročnika in prilagojene na parcelo, da je le ta najbolje izkoriščena. Najlepši in najboljši projekti nastanejo takrat, kadar so naročnikove želje prepletene med idejami oblikovalca in arhitekta.

MORE ABOUT HöNA MOBILE HOUSES

To make your decision easier, HöNa MOBILE HOUSES offers you four types of units. However, each type unit can be modified according to the customer's wishes, as there are no restrictions in production.

If you have a basic concept of idea of your dream house, just present it to our architects, where your wishes will be incorporated into the ideal unit.

Typical units vary in terms of square footage, interior design, colour of the facade or envelope. At the customer's request, the standard units can also be varied in terms of square footage and furnishings, and you can choose whether or not to have a terrace next to the house.

For the interior furnishings, we offer you the option of choosing from a catalogue or having the interior furnishings made to your specifications, which is why we have divided the houses into three types of units, which differ according to the thickness of the walls, the materials used, the furnishings and the finishing layers.

In addition to the thick insulation system, triple thermopane windows offer additional protection. All the insulation components work together to create extremely good noise protection.

The Rephanol flat roof is the oldest and most widely recognised quality roofing product in the world, manufactured in Germany.

The units can also be joined together in both horizontal and vertical positions, depending of course on the customer's preference. For those who want more luxury in their home, a jacuzzi or sauna can also be added on the second level.

Our four standard units are: HöNA Hooneymoon, Antonia, Good life and Big dreams.

In addition to the standard units, we also produce custom-made houses, varying in size as well as in appearance. This has resulted in mobile units of 24m² and 252m². They are made according to the client's wishes and the plot is adapted to make the best use of it. The most beautiful and best projects are created when the client's wishes are intertwined with the ideas of the designer and the architect.

HöNA POČIVALNIK vas bo zazibal v svet brezskrbnosti in napolnil z energijo. Počivalniki so izdelani iz kvalitetnih materialov in se zlahka zlijejo z okolico.

All you need is a vacant plot of land, which you can bring to us and we'll draw up a concept design for your afternoon retreat. Nothing beats a glamping site as luxurious as a glamping with its own hot tub and sauna. You can choose from a few ready-made resorts, or we can design one together. You can choose from the units in our range, or we can make everything to your specifications. Glamping villages are equipped with modern wooden houses, which are air-conditioned and heated and suitable for year-round living. They have a bathroom with shower, and some of them also have a sauna and an outdoor bathtub.

The houses have been thoughtfully designed according to your wishes and the plot, in order to make the best use of all the parameters.
